Play a key role in keeping critical production equipment running smoothly. As a Production Support Engineer, you will ensure the reliability and integrity of manufacturing equipment in a regulated environment, working closely with manufacturing and quality teams to troubleshoot issues, perform maintenance, and improve processes that support safe and reliable operations. This is a hands-on role where your technical expertise and attention to detail will make a real difference every day.

## About the Role

### Key Responsibilities

- Perform preventive and corrective maintenance to support reliable operation of production equipment.
- Troubleshoot equipment failures and implement timely, effective technical solutions.
- Execute inspection and calibration activities in line with defined protocols and standards.
- Collaborate with manufacturing and quality teams to resolve technical challenges and align priorities.
- Manage spare parts administration in coordination with maintenance and reliability engineering.
- Contribute to continuous improvement through input on equipment and process enhancements.
- Develop technical documentation and support training for production operators where needed.

### Essential Requirements

- Degree in Engineering or a related field with relevant maintenance experience.
- Proven experience in maintenance and facility engineering within a production environment.
- Experience working in a regulated environment such as Good Manufacturing Practice.
- Strong technical skills in troubleshooting, root cause analysis, and equipment maintenance.
- Fluent in English, both written and spoken.

### Commitment to Diversity and Inclusion

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

**Why Novartis:** Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
