Сводка

Job Title: Scrum Master DD&IT US&I AMERICAS
#LI-Hybrid
Location: Mexico City, Mexico [INSURGENTES]

Relocation Support: This position is located in Mexico City, Mexico. Novartis cannot provide relocation assistance, so please apply only if you are able to access the location.

As a Scrum Master, you will help drive delivery excellence for global digital projects. You will lead Agile teams, manage end-to-end project delivery in challenging environments, and act as a reliable partner for business and technology stakeholders. Your focus will be on ensuring consistent, high-quality results, fostering collaboration, continuous improvement, and strong governance for both Agile and hybrid projects.

Novartis is transforming medicine through digital, data, and technology. We are seeking a Scrum Master with solid Project Management experience who can lead Agile delivery, and also apply Waterfall project management skills to future initiatives when needed.

The main responsibility of this role is to coach and support Agile teams in delivering quality outcomes, while also managing complex IT projects from start to finish using Waterfall or hybrid approaches when required by business context, compliance, or scale.

About the Role

Key Responsibilities

Agile / Scrum Master Accountabilities (Primary Focus)

- Accountable for **one to two Scrum teams of medium to high complexity** (typically **USD 3M+** in Agile team accountability).
- Act as a **servant leader and coach**, ensuring teams live Agile values and principles while continuously improving ways of working.
- Establish and maintain a **high-trust, high-performance environment** enabling team effectiveness and self-organization.
- **Facilitate all Agile ceremonies** (Sprint Planning, Daily Stand-ups, Reviews, Retrospectives).
- Remove impediments, protect the team from external disruption, and **support effective conflict resolution**.
- Partner closely with **Product Owners** to support backlog refinement, prioritization, and flow of work.
- Foster an Agile mindset across teams and stakeholders, promoting transparency, collaboration, and continuous improvement.
- Track and communicate Agile delivery metrics (velocity, cycle time, burn-down/burn-up, quality).

Project Management / Waterfall Accountabilities (Required Capability)

- **Manage end-to-end delivery of internal and outsourced IT projects** from initiation through transition to operations, when Waterfall or hybrid governance is required.
- Establish and operate **project governance**, including steering committees, risk and issue management, and decision forums.
- Own **project planning, execution, monitoring, and control** ensuring delivery on time, within budget, and to agreed scope and quality.
- Lead **cut-over, change management, and end-user adoption activities** associated with releases.
- Drive **stakeholder communications**, acting as the primary escalation point for project-related issues.
- Maintain transparent and accurate **project reporting**, including status, risks, dependencies, and financials.
- Ensure adherence to **Security, Risk, and Compliance** policies and procedures.
- Collaborate effectively with IT functions, business partners, and strategic suppliers in **aglobal, matrixed organization**.
- Support regional deployment activities for large enterprise programs from planning through change and stabilization.

Essential Requirements

Education & Certifications

- Bachelor's degree in computer science, Engineering, Information Technology, or equivalent experience.
- **Agile / Scrum certification required** (CSM, PSM, SAFe, or equivalent).
- **PMP or equivalent Project Management certification** strongly preferred.
- Coaching or Continuous Improvement certifications are a plus.

Experience & Skills

- **5–10 years of IT project delivery experience** in large, global, and complex environments.
- **Proven hands-on experience as a Scrum Master**, coaching Agile teams to high performance.
- **Strong experience delivering Waterfall or hybrid projects**, including governance, budgeting, risk, and change management.
- Experience working with **global and regional stakeholders**, preferably in Commercial, Digital, or Enterprise IT domains.
- Knowledge of **Pharma / Life Sciences** industry is a strong plus.
- Solid understanding of the **software development lifecycle**.
- Demonstrated ability to manage ambiguity, influence without authority, and drive outcomes under pressure.
- Hands-on experience leading **Change Management workstreams**.
- Excellent stakeholder management, facilitation, and communication skills across geographically dispersed teams.

- Establish and maintain a **high-trust, high-performance environment** enabling team effectiveness and self-organization.
- Remove impediments, protect the team from external disruption, and **support effective conflict resolution**.

Technical & Tooling Skills

- Agile and Project Management tools: **Jira, Microsoft Project, ServiceNow**
- Microsoft Office: **Excel, PowerPoint, Word**
- Desirable exposure to: **Salesforce (Marketing Cloud, Health Cloud, Sales Cloud), Veeva CRM, Drupal or other CMS platforms**

Desirable Requirements

- Experience working in pharmaceutical or life sciences environments
- Familiarity with Agile and project management tools such as Jira, Microsoft Project, and ServiceNow
- SaFe scrum master certification
