Сводка

Are you ready to shape how a global organisation manages its most critical asset - its people? We are seeking a Senior Specialist, Resource Management & Operations to join the Business Planning & External Partnerships team within the Biomedical Research Data & Digital organisation at Novartis. In this role, you will help shape how our organisation plans, manages, and optimises its workforce processes - giving senior leaders visibility, structure, and support. Your work will directly contribute to stronger operational excellence, better resource transparency, and more effective delivery across a complex global environment.

This is an exciting opportunity for someone who enjoys combining strategy, operations, and stakeholder partnership. You will work closely with senior leaders across BR Data & Digital, influence how resource management evolves, and help build processes that are scalable, data-driven, and fit for the future. If you are motivated by ownership, continuous improvement, and meaningful impact, this role offers a strong platform for growth and visibility.

Location: Prague, Czech Republic #LI-Hybrid

This role is based in Prague, Czech Republic. Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

About the Role

Responsibilities:

- Owns and continuously evolve the end-to-end Resource Request process for D&D's internal and external workforce, considering business needs, scalability, efficiency and cost discipline.
- Partner with senior stakeholders across D&D as well as external partners to connect resourcing decisions to strategic priorities, delivery goals, and financial planning cycles.
- Manage request pipeline and ensure requests keep moving by monitoring SLA performance, removing bottlenecks, and escalating risks or delays before they impact delivery.
- Lead the design and operation of the resource tracking ecosystem across JIRA, Planview, and supporting tools, creating a trusted, connected view of workforce data.
- Set the standard for data quality across resource categories by establishing clear governance, ownership, and accountability for accurate, current information.
- Bring together resource data from internal trackers, vendor reports, and Planview, reducing manual effort and unlocking opportunities for smarter automation.
- Create KPIs and dashboards that give leadership clear, timely insight into the resource pipeline, allocation, vendor performance, and SLA compliance.
- Act as the go-to leader for resource management topics across D&D, partnering confidently with all leads across resource capability areas
- Turn operational data into strategic insight, helping senior stakeholders make informed, confident decisions.
- Champion the resource management process across the organisation, building trust, driving adoption, and showing the value of disciplined, high-impact resource management.

Essential for the role:

- Bachelor's degree in business, Economics, Finance or **related field**

- Proven experience working in business operations areas such as resource management, workforce planning or vendor management
- Demonstrated experience owning and improving complex, cross-functional processes within a matrix organisation
- Strong strategic and operational mindset with the ability to translate direction into effective execution
- Experience engaging and influencing senior stakeholders across functions and levels
- Strong analytical and data governance skills, with the ability to design dashboards, define KPIs and translate operational data into strategic insight
- Experience working with resource or project management tools such as JIRA, Planview or similar enterprise platforms
- Excellent written and verbal communication skills in English, with the ability to convey complex topics clearly
