Сводка

Location: Tuas South Avenue, Singapore #LI-Hybrid

Internal job title: ITOT Lead

This role is based in Singapore. Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

About the Role:

The ITOT Lead will lead the Automation organization, which is responsible to establish, maintain and improve the automation processes with respect to buildings, equipment and utilities in the assigned region / site. The Lead coordinates all strategic automation projects and initiatives. The role provides cost-effective and efficient technical solutions, standards, strategies and acts as a competence center for automation and interface to IT.

About the Role

Key Responsibilities:

- Responsible for Strategy & Organizational Development, in terms of preparing monthly engineering reports with key KPIs (Capex, Maintenance, HSE and Quality), supporting internal and external audits, implementing technical standards, implementing GOPs, where needed creation of regional / site SOPs & templates, and lead and contribute to equipment, utility, facility improvement projects (e.g. energy efficiency, productivity, environmental compliance, maintenance).
- Focus on Automation, drive Technical Operations and Computer Systems Life Cycle Management of ITOT Systems, and develop & implement recipe authoring aspects of control systems (DCS / MES / Scada / PLC's / Lab applications / Control Networks);
- Design, implement & maintain Historian Configuration for modules / visualization / OPEX;
- Implement Software Change Controls associated with automation / system changes; develop & deliver OT activities (e.g. Backup & Recovery / Patch Management / Remote Access / User Access) and establish & maintain new / modified end-to-end ITOT services / processes / procedures for Automation / Manufacturing / QC equipment
- Develop contractual strategy and framework to manage vendors / contractors and corresponding contracts in operations or project scope
- Responsible for Project Engineering & Control: prepare Equipment Specifications and System Requirements in project (e.g. User Requirement Specification); prepare / execute Project Health & Safety Risk Assessments (Equipment / Process); develop test specification / plan for commissioning & qualification in projects; perform new equipment FAT / SAT / inspections in project; perform provisional and final project handover.

Essential Requirements:

- 10+ years of experience in engineering and ITOT
- Experience in DeltaV DCS / Syncade MES / Siemens PLC's / PI Historian / Control Networks / Control Protocols
- Strong stakeholder management and excellent communication skills
- People management skills with strong ability to provide technical leadership and a passion for people development in technical areas

Desirable requirements:

- AI, Data and Digital mindset
- Operational excellence and continuous improvement mindset

Commitment to Diversity & Inclusion:

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.
