Сводка

Location: Basel, Switzerland

This role is based in Basel, Switzerland. Novartis is unable to offer relocation support for this role. Please only apply if this location is accessible for you.

We are looking for an associate to join the Analytical Characterization (AC) team in Basel, Switzerland. AC supports Novartis' new biological entities (NBEs) development from proof-of-concept in human (i.e., finalization of the first phase I clinical trial) to commercialization and life-cycle management activities. AC applies a wide range of analytical techniques to characterize biopharmaceutical products. The AC team belongs to the Analytical Development unit, which is part of Novartis Technical Research and Development (TRD).

As part of the surface plasmon resonance (SPR) laboratory team within AC, the successful applicant will provide analytical support for NBE development by using state-of-the-art biophysical techniques to elucidate binding affinity and kinetics of the active pharmaceutical ingredient to its biological target and to immune receptors. The applicant will work in a highly collaborative and scientific environment, in close interaction with other experts in the analytical community.

About the Role

Accountabilities include

- Plan and perform analytical protein characterization by using SPR
- Develop new SPR methods and apply established methods
- Evaluate and document results accurately and in consistent quality
- Writing of study reports and analytical method description
- Support the technical organization of the laboratory
- Troubleshoot problems in already established methods

Minimum requirements

- B.Sc./M.Sc. with specialization in biochemistry, biophysics, or analytical chemistry
- Preferably prior experience in surface plasmon resonance
- Experience in working with proteins is considered an asset
- Your strengths include critical and objective interpretation of results and scientific information.
- Applicants should have good organizational and team skills, and good knowledge of English and MS Office software.

Benefits & Rewards

At Novartis, we're committed to reimagining medicine together - and rewarding the people who make it happen.

Expected Annual Base Salary Range for role: 76,300.00 - 141,700.00 CHF

The base salary offered is determined based on gender-neutral objectives, such as relevant skills, competencies and experience in accordance with the Novartis pay setting policy and upon joining Novartis will be reviewed periodically.

In addition to your base salary, you may be eligible for a performance-based bonus depending on certain performance parameters.

The rewards of being part of our team go far beyond base pay and incentives. We also offer a variety of competitive benefits in kind to help you thrive personally and professionally, such as insurance plans, retirement plans, wellbeing resources and global recognition programs. In addition, we provide flexible and hybrid working options, where possible, and minimum 14 weeks paid parental leave.

Read our brochure to learn more about our global total rewards offering:

Note: Benefits and compensation may vary by country and are subject to local legal requirements, including provisions of collective bargaining agreements where applicable. A full overview of your compensation package, including any relevant collective bargaining agreement details applicable to your role based on your employment location and Novartis employer entity, will be communicated separately to you during the application process.

Commitment to Diversity and Inclusion / EEO paragraph

Novartis is committed to building an outstanding, inclusive work environment and diverse teams' representative of the patients and communities we serve.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
