июл 01, 2026
Япония
で利用可能: 日本語 | [English](#)

Сводка

Are you passionate about translating cutting-edge science into meaningful clinical impact? As a Biomarker Lead in Translational Medicine Japan, you will shape and drive biomarker strategies across early to late-stage clinical development programs. You will play a critical role in bridging preclinical discoveries with clinical application, working cross-functionally and externally with key opinion leaders to advance biomarker science. This is a highly visible leadership role where your expertise will directly influence clinical decision-making, patient selection, and the success of innovative therapies.

About the Role

Key Responsibilities

- Lead biomarker strategies across projects from early discovery through late-stage clinical development
- Drive translation of preclinical discoveries into fit-for-purpose clinical biomarker plans
- Build and maintain strategic collaborations with academic partners and clinical sites
- Provide scientific leadership within Japan and across global matrix teams
- Integrate biomarker strategies into clinical protocols and study designs
- Partner with internal experts to plan and execute biomarker studies effectively
- Interpret biomarker data and contribute to clinical study reports and decision-making
- Ensure alignment across therapeutic areas, indications, and global biomarker leaders
- Support regulatory interactions related to biomarkers and translational research
- Represent biomarker strategies in internal and external scientific discussions

Essential Requirements

- Advanced degree (Doctor of Philosophy, Medical Doctor, or Master of Science) in a relevant scientific field
- Strong expertise in biology and translational research applied to clinical drug development
- Significant experience in pharmaceutical, biotechnology, or translational research environments
- Proven contributions to clinical programs and studies, preferably in the pharmaceutical or biotechnology industry
- Experience working with quantitative data such as biostatistics, omics, or bioinformatics is preferred
- Demonstrated ability to lead and collaborate in cross-functional, matrix teams
- Strong leadership presence with the ability to influence stakeholders across complex organizations
- Fluent in Japanese and English, both written and spoken

Desirable Requirements

- Experience with advanced analytical approaches such as artificial intelligence, machine learning, or computational biology
- Established network with key opinion leaders in academia or clinical research environments

Benefits and Rewards

Read our handbook to learn about all the ways we'll help you thrive personally and professionally:
